

## **GOSFORD CITY COUNCIL**

# **PESTICIDE USE NOTIFICATION PROCEDURE FOR OUTDOOR PUBLIC PLACES**

**December 2006**

## INTRODUCTION

Gosford City Council ('Council') is responsible for the management of a large area of land within the Gosford local government area. Refer to Appendix 2 for a map of the regional context of the Gosford LGA and Appendix 3 for a register of public places owned or managed by Council for recreation activities. Council is obligated under the *Noxious Weeds Act 1993* (NSW) to control noxious weeds on land for which it is responsible. Under the *Threatened Species Conservation Act 1995* (NSW) Council is also responsible for implementing the actions specified in threat abatement plans to manage key threatening processes, such as predation by the European Red Fox, in order to protect threatened species.

A variety of methods are available to control pests, each method has advantages and disadvantages. Before conducting pest control, Council considers the environmental, social and economic aspects of the methods available. Where practical, Council aims to employ methods other than pesticide application to control pests or to minimise the risk of harm from pesticide use by applying the control hierarchy provided in the *Safe Use of Pesticides Including Herbicides in Non-agriculture Workplaces* (2006) published by Workcover NSW. If pesticide application is determined to be the most efficient and practical method, legislative requirements (including record keeping and trained operators), label instructions, relevant permit requirements and Licence conditions are adhered to.

The Department of Environment and Conservation (2006) defines pesticides as any substance or mixture of substances used to destroy, suppress or alter the life cycle of any pest. Pesticides include herbicides, fungicides, insecticides, fumigants, bactericides, rodenticides, baits, lures, repellents and pesticides used on animals to control external parasites (refer to glossary in Appendix 1). Council's main pesticide uses are herbicide application for weed control and insecticide application for control of certain insect pests in specific locations. Council holds an Environmental Protection Licence (#7643), issued by the Department of Environment and Conservation, for the application of herbicides to the waterways of Gosford local government area. Bait insecticides are used for termite and ant control to protect structures and public safety wherever this is considered an effective method. Other pesticide uses include fungicides, rodenticides, bird baits and large vertebrate baits.

This Pesticide Use Notification Procedure has been prepared in accordance with the requirements of the *Pesticides Regulation 1995* (NSW). The aim of the procedure is to meet the community's basic 'right to know' about pesticide applications made to outdoor public places that are owned or controlled by Gosford City Council. The procedure allows members of the community to take action to avoid contact with pesticides, if they wish.

In 2002 Gosford City Council adopted the Integrated Management System (IMS), which integrates Council's occupational health and safety and environmental management systems. The Pesticide Use Notification Procedure is an attachment to the IMS Program for Fungicides and Pesticides. The Pesticide Notification Plan is also referred to in all Standard Work Procedures that include pesticide use. These Programs and Procedures ensure that pesticides are applied to public places in a safe and responsible manner, minimising harm to employees, the community and the environment.

The Pesticide Use Notification Procedure describes how Gosford City Council will notify members of the community of pesticide applications it makes or allows to be made to public places that it owns or controls. The procedure describes:

- o Public places covered by this procedure;
- o Who regularly uses these public places, an estimate of the level of use and the types of pesticides Council may use;
- o How and when Council will notify the community of pesticide use in outdoor public places;
- o How the community will be notified of the procedure;
- o How future reviews of the procedure will be conducted; and
- o Contact details for anyone wishing to discuss this procedure with Council.

*This procedure only applies to pesticides used in **outdoor** public places and around the **exterior** of Council buildings.*

## **PUBLIC PLACES COVERED BY THIS PROCEDURE**

Gosford City Council proposes to use or allow the use of pesticides in the following categories of outdoor public places that it owns or controls in the local government area:

- o Public gardens;
- o Parks;
- o Playgrounds & BBQ areas (including Mangrove Dam);
- o Sporting fields and exterior of sporting facilities (including courts, skate and bike facilities and stadiums);
- o Golf courses and bowling greens;
- o Camping grounds;
- o Foreshore reserves;
- o Bushland reserves (excluding BBQ areas);
- o Beaches and dunes;
- o Waterways and enclosed water bodies (including drainage channels, coastal lagoons and wetlands);
- o Water supply catchments (Mangrove and Mooney Mooney Creeks);
- o Bridges and wharves;
- o Road verges and reserves (including medians, roundabouts and streetscapes);
- o Laneways and pathways;
- o Easements accessible to the public (including road, water and sewer);
- o Landfills;
- o Council structures (e.g. bus shelters and car parking stations); and
- o Exterior of Council buildings (including amenity blocks, community centres, theatres and galleries, libraries, shopping centres).

Gosford City Council's estimate of the level of community use, regular user groups and types of pesticide used in each of the categories of outdoor public places owned or controlled by Council is summarised in the following table. Although not required by the *Pesticides Regulation 1995 NSW*, a summary of the type of pesticide use in each category of public place is also provided. Note some public places may include crown land under Council's care control and management.

<b>Public places</b>	<b>Regular user groups</b>	<b>Level of use</b>	<b>Type of pesticide used and application method</b> (glossary in Appendix 1)
<b>Public gardens</b>	<ul style="list-style-type: none"> <li>▪ General community</li> </ul>	High	<ul style="list-style-type: none"> <li>▪ Direct application of herbicides</li> <li>▪ Low volume spraying of herbicides or insecticides</li> <li>▪ High volume spraying of herbicides</li> <li>▪ Spraying of fungicides</li> <li>▪ Spraying of termiticides</li> </ul>
<b>Parks</b>	<ul style="list-style-type: none"> <li>▪ General community</li> </ul>	Medium	<ul style="list-style-type: none"> <li>▪ Direct application of herbicides</li> <li>▪ Low volume spraying of herbicides or insecticides</li> <li>▪ High volume spraying of herbicides</li> <li>▪ Spraying of fungicides</li> <li>▪ Spraying of termiticides</li> </ul>
<b>Playgrounds &amp; BBQ Areas (including Mangrove Creek Dam)</b>	<ul style="list-style-type: none"> <li>▪ General community</li> </ul>	High	<ul style="list-style-type: none"> <li>▪ Direct application of herbicides</li> <li>▪ Low volume spraying of herbicides or insecticides</li> <li>▪ High volume spraying of herbicides</li> <li>▪ Spraying of termiticides</li> <li>▪ Bait bird control</li> <li>▪ Rodenticides</li> </ul>

<b>Council structures (including bus shelters) and exterior of Council buildings (including amenity blocks)</b>	<ul style="list-style-type: none"> <li>▪ General community</li> <li>▪ Council staff</li> <li>▪ Sporting groups</li> </ul>	High	<ul style="list-style-type: none"> <li>▪ Low volume spraying of herbicides or insecticides</li> <li>▪ High volume spraying of insecticides</li> <li>▪ Spraying of termiticides</li> <li>▪ Bait termiticides</li> <li>▪ Bait rodenticides</li> <li>▪ Bait bird control</li> </ul>

## NOTIFICATION ARRANGEMENTS

This section of the procedure describes how and when Gosford City Council will provide notice of pesticide use in outdoor public places, including special measures for sensitive places that are adjacent to public places, arrangements for emergency pesticide applications and circumstances where notice will not be given.

These notification requirements are based on Gosford City Council's assessment of:

- The level of use of public places where pesticides may be used;
- The extent to which members of the public who are most likely to be sensitive to pesticides (for example children, sick, pregnant or elderly people) use these areas regularly;
- The extent to which activities generally undertaken in these areas could lead to some direct contact with pesticides (such as BBQ areas where food is consumed, sporting or other recreational activities that result in contact with the ground); and
- Type of pesticide used.

Notice of pesticide use will be provided by one or more of the following methods:

- Signs;
- Information on Council's website (which will describe programmed pesticide use in public places);
- Letters;
- Fax and email;
- A notice in a local newspaper;
- Door knocking;
- Letterbox drop; and/or
- Phone contact.

Council will also allow persons and organisations to nominate to have their details placed on a central register which would allow them to be notified of certain types of pesticide uses in particular places, as described in this section of the procedure.

### ***Outdoor recreation areas***

The notification procedures described below will apply to the following public place categories owned or controlled by Council within the local government area:

- Public gardens;
- Parks;
- Playgrounds and BBQ areas;
- Sporting fields and facilities;
- Golf courses and bowling greens;
- Camping grounds;
- Foreshore reserves;
- Bushland reserves; and
- Beaches and dunes.

Appendix 3 provides the name and address of Council owned or managed land for recreational use.

In these public places, signs will be erected near the application area or main entrance immediately prior to application and removed immediately after application (if label instructions for the selected pesticide provide a withholding period, the signs will be removed after this period has expired) for the following pesticide uses:

- Direct application of herbicides;

- Low volume spraying of herbicides or insecticides;
- High volume spraying of herbicides and insecticides;
- Spraying of fungicides; and
- Spraying of termiticides.

If a spray vehicle is used, an additional sign will also be attached to the vehicle.

If bait termiticides, bait bird control or rodenticides are used in outdoor recreation areas, including outdoor BBQ facilities, signs will be provided to the general community near the application area or main entrance on the day of application and removed seven days following application.

Where any of the above pesticide uses occur adjacent to sensitive places (see glossary) the occupiers will be provided with 48 hours prior targeted notice by phone, fax, email or letterbox drop (whichever is most practical).

In addition to the notification requirements stated above:

- For **playground and BBQ areas** only, signs will be provided to the general community near the application area or main entrance on the day of application and removed the day following application, for all the above pesticide uses (excluding bait termiticides, bait bird control or rodenticides).
- For **sporting fields and facilities** only, sporting groups, schools and occupiers of adjacent sensitive places that register interest with Council can also have notice of high volume spraying of herbicide and insecticide programs faxed or emailed at least 48 hours prior to application.
- For **public gardens** only, if pesticides must be applied during periods of high use and work cannot be scheduled at another time, a Council employee will be present to observe pedestrian movements and prevent access to the area during application.
- For **bushland reserves** only (specifically Katandra Reserve, Kincumber Mountain Reserve and Rumbalara Reserve), signs will be erected at least five days prior to the commencement of large vertebrate baiting. Signs will remain erected during baiting and for a minimum of four weeks from the last day of baiting. Signs will be erected at:
  - Every man made entrance to the bushland reserve;
  - At every entrance to the baiting location;
  - At the extremities of and at 1km intervals along the boundaries where the bushland reserve adjoins a public thoroughfare; and
  - At the extremities of and at 1km intervals along any public thoroughfare traversing the bushland reserve but not along internal roads, tracks or trails.

Public notification will also include an advertisement in a local newspaper at least five days prior to the commencement of baiting. All neighbours immediately adjoining the bushland reserve boundary, within 300m of the site where baits will be laid, will be given a minimum of five days written notice prior to the commencement of the baiting program. Public notification will include details of the baiting program and a reminder that dogs and cats are prohibited in bushland reserves.

- For **golf courses** and **bowling greens** only, information on the quarterly program for all pesticide uses listed in Table 1 shall be available in a printed brochure from the administration office.

- For **Bushcare sites**, pesticide use will not be scheduled on days that a group works. In the event that this is not possible, the Bushcare Convener will be notified at least 24 hours prior to application.

### ***Waterways and enclosed water bodies***

For low or high volume spraying of selective herbicides to waterways, notification will be provided in accordance with Environmental Protection Licence #7643 conditions, which include:

- Information published in a notice in a local newspaper at least 7 days prior to the application to waters,
- Written notification to any occupiers of waters, or any occupier of land adjacent to the waters, into which herbicides are to be applied at least 7 days in advance, and
- Erection of a warning sign adjacent to the waters into which herbicides are to be applied, remaining erected until water is safe for use.

For application of algaecides to waterways, notification will be provided in accordance with Environmental Protection Licence #12170 conditions, which include:

- Information published in a notice in a local newspaper at least 7 days prior to the application to waters,
- Written notification to any occupiers of waters, or any occupier of land adjacent to the waters, into which algaecides are to be applied at least 7 days in advance, and
- Erection of a warning sign adjacent to the waters into which algaecides are to be applied, remaining erected until water is safe for use.

### ***Outdoor public thoroughfares, water supply catchments and certain easements accessible to the public***

The notification arrangements described below will apply to the following categories of public place owned or controlled by Council within the LGA:

- Water supply catchments;
- Bridges and wharves;
- Road verges and reserves, including table drains not holding water, medians, roundabouts and streetscapes;
- Laneways and pathways; and
- Easements.

In these public places, information on the forward program of high volume spraying of noxious weeds declared under the *Noxious Weeds Act 1993 NSW* will be posted annually on Council's website.

In these public places, where:

- Direct application of herbicides;
- Low volume spraying of herbicides;
- High volume spraying of herbicides;
- Spraying of termiticides; and
- Bait termiticides

is to take place, signs will be erected immediately prior to spraying and removed immediately after spraying. Signs will be placed at the beginning of the area to be sprayed, except for roundabouts where signs will be placed at major access points. Spraying shall occur at no more than 1km from the sign. Signs will indicate the full product name and contact details for enquiries. An additional sign will also be attached to the spray vehicle during operation.

Notice will not be given where occupiers of properties adjacent to Council public places use pesticides on parts of these public places adjacent to their properties.

Herbicide spraying or termiticide application will not take place on outdoor public thoroughfares, bridges and wharves and easements adjacent to sensitive places when these places are in use. For example, herbicide spraying could occur during school holidays or out of school hours. In addition, prior notice by mail or letterbox drop will be provided at least five days before pesticide application.

Certified organic farmers, and/or parties who register interest with Council (for example immunodeficiency), may request that Council does not apply pesticides adjacent to their property, if they supply copies of certification. Council will continue not to apply pesticides adjacent to the property, as long as the property owner eradicates all noxious weeds and maintains the height of grassed verges to a maximum of 25cm. Certified organic farmers are also requested to erect signs at property boundaries indicating 'organic farm'.

For **water supply catchments** only, signs will be erected at every man made entrance into the catchment one week prior to, during and four weeks following large vertebrate baiting. All neighbours immediately adjoining the water supply catchment boundary, within 300m of the site where baits will be laid, will be given a minimum of five days written notice prior to the commencement of the baiting program. Information regarding large vertebrate baiting programs will also be published in a notice in a local newspaper two weeks prior to the commencement of baiting.

### ***Council structures, landfills and Council buildings exteriors***

For pesticide use at Council structures, landfills and building exteriors (including amenity blocks, community centres, theatres and galleries, libraries and shopping centres), signs will be erected near the application area or main entrance immediately prior to application and removed once pesticide application has finished for the following pesticides uses:

- Direct application of herbicides;
- Low volume spraying of herbicides or insecticides;
- Spray termiticides;
- Bait termiticides;
- Bait rodenticides; and
- Bait bird control.

For high volume spraying of insecticides or termiticides at Council structures, landfills and building exteriors, signs will be erected near the application area or main entrance immediately prior to application and will remain erected for 24 hours following pesticide application.

Council's annual pest and noxious weed control program will also be displayed on Council's website, which will specify the location, type of pesticide to be used and intended period of application.

Where any of the above pesticide uses occur adjacent to a sensitive place, the occupiers will be provided with 24 hours prior targeted notice either in person or by phone, fax, mail or letterbox drop (whichever is most practical). Also, signage will remain erected for 24 hours following application.

### ***Special measures for sensitive places***

Clause 11J(1) of the *Pesticides Regulation 1995* NSW defines a sensitive place to be any:

- School or pre-school;
- Kindergarten;
- Childcare centre;
- Hospital;
- Community health centre;
- Nursing home; and
- Any additional place declared to be a sensitive place by the Environment Protection Authority (now a part of the Department of Environment and Conservation).

Special notification measures for programmed pesticide use in outdoor public places adjacent to sensitive places, for each category of public place, have already been noted.

For non-emergency reactive pesticide use in outdoor public places next to sensitive places, Council will provide concurrent notice shortly before use to the occupier by phone, door-knock or letterbox drop, depending upon what is practical.

If a pesticide must be used to deal with an emergency in an outdoor public place that is adjacent to a sensitive place, Council will organise a door-knock of that sensitive place, immediately before application, so people are aware that a pesticide is about to be used to deal with a dangerous pest infestation.

### ***Notification of emergency pesticide applications***

In cases where emergency pesticide applications in public places are required to deal with biting or dangerous pests such as wasps, bees, venomous spiders, fleas, bird mites, ants or rodents (that pose an immediate health hazard), or pests that pose immediate risk of harm to assets (e.g. army grubs at sporting fields), Council will provide notice by erecting signs near the application area or main entrance immediately prior to application, removing them immediately after, for the following pesticide uses:

- Low volume spraying of insecticides;
- High volume spraying of insecticides; and
- Bait rodenticides.

A sign will also be attached to the spray vehicle during operation.

### ***Pesticide contractors and lessees of public places***

Gosford City Council may engage contractors to perform maintenance or pest control activities, on its behalf, on public land. As part of these activities, if a contractor must use pesticides on public land, Gosford City Council will ensure that the contractor notifies the community in accordance with the requirements of this procedure.

Where persons or organisations hold an existing lease on Gosford City Council land that remains a public place and if they use pesticides in this area, Gosford City Council will still require notification in accordance with the requirements of this procedure.

### ***Types of pesticide use for which no notice will be provided***

Notice will not be provided for the use of pesticides (such as chlorine) for the purpose of water treatment in outdoor public places, such as spas, pools and water features.

Council may use small quantities of some pesticides that are widely available in retail outlets and ordinarily used for domestic purposes (including home gardening). Examples include control of minor outbreaks of outdoor insect pests using baits or aerosol cans and spot weed control using a hand-held applicator or paint brush for cut and paint technique (see 'direct application' in glossary in Appendix 1). The *Pesticide Regulation 1995* NSW clause 11B subclause (2) provides a small-scale exemption for record keeping if the pesticide:

- Is ordinarily used for domestic purposes (including home gardening); and
- Is widely available to the general public at retail outlets (for example, at supermarkets); and
- Is being applied by hand or hand-held applicator; and
- Is being used in a quantity that in the case of outdoor use is appropriate for outdoor domestic purposes (so long as it does not exceed 20 litres or 20 kilograms of 'ready-to-use' product or 5 litres or 5 kilograms of concentrated product).

The small-scale exemption will be adopted for the purposes of this notification procedure. Notice of pesticide use in outdoor public places will not be provided if all of the conditions listed above are met. If a team of workers apply pesticides, the small-scale exemption applies to each individual user. That is, notification will not be provided if each individual meets the conditions listed above.

## **WHAT INFORMATION WILL BE PROVIDED**

In accordance with clause 11L(2)(g) of the *Pesticides Regulation 1995* NSW, notice of pesticide uses will include the following information:

- The full product name of the pesticide to be used; and
- The purpose of the use, clearly setting out what pest or pests are being treated; and
- The proposed date/s or date range of the pesticide use; and
- The places where the pesticide is to be used; and
- Contact telephone number and email address of the Council officer who people can contact to discuss the notice; and
- Any warnings regarding re-entry to or use of the place, if specified on the pesticide product label or the APVMA<sup>1</sup> permit.

## **HOW THE COMMUNITY WILL BE INFORMED OF THIS PROCEDURE**

Gosford City Council will advise residents of this procedure and its contents by:

- Making a copy of the procedure available for public viewing, free of charge, at its main customer service centre at 49 Mann Street, Gosford, during office hours;
- Placing a copy of the procedure on the Council website at [www.gosford.nsw.gov.au](http://www.gosford.nsw.gov.au);
- Placing a notice in *Express Advocate - Gosford Edition*; and
- Placing a notice in the *NSW Government Gazette*.

---

<sup>1</sup> The Australian Pesticides and Veterinary Medicines Authority (APVMA), the national government body responsible for assessing and registering (or otherwise approving) all pesticide products in Australia and for their regulation up to and including the point of retail sale.

## **FUTURE REVIEWS OF THE PROCEDURE**

The notification procedure will be reviewed every three years or when circumstances require a review of the procedure. The review will be co-ordinated by the Environment Officer (IMS). The review will include:

- A report on progress of implementing the procedure;
- Placing the procedure on public exhibition, with any proposed changes and calling for public submissions; and
- In light of public submissions, making recommendations for alterations (if applicable) to the procedure.

## **CONTACT DETAILS**

Anyone wishing to contact Gosford City Council to discuss the notification procedure or to obtain details of pesticide applications in public places should contact:

*Chief Weeds Officer  
49 Mann St, Gosford.  
NSW. 2250.  
Phone: (02) 4325 8222  
Fax: (02) 4323 2477  
Email: [goscity@gosford.nsw.gov.au](mailto:goscity@gosford.nsw.gov.au)  
or access the website [www.gosford.nsw.gov.au](http://www.gosford.nsw.gov.au)*

## **APPENDIX 1**

## **GLOSSARY**

## **GLOSSARY** (Sourced from <http://www.epa.nsw.gov.au/envirom/pestwhtr.htm>)

**Algaecides** - These are pesticides used specifically for controlling algae blooms, for example in waterways.

**Bactericides** - These destroy, suppress or prevent the spread of bacteria. Examples are swimming pool chemicals containing chlorine, and products used to control black spot (bacterial blight) on garden plants or in orchards. Disinfectants for household and industrial use are excluded and are not considered pesticides.

**Baits** - These are ready-prepared products or products which need to be mixed with a food to control a pest. This category includes baits prepared for the control of large animals, such as foxes and rabbits, and baits for insects, such as cockroaches and ants.

**Direct application** - Method of applying concentrated liquid immediately onto target, for example cut and paint technique whereby concentrated herbicide is directly painted onto the cut stump of a plant, or drill and fill technique whereby holes are drilled in woody stump and filled with a small volume of concentrated herbicide.

**Fungicides** - These control, destroy, render ineffective or regulate the effect of a fungus; for example, fungicides are used to treat grey mould on grape vines and fruit trees.

**Herbicides** - These destroy, suppress or prevent the spread of a weed or other unwanted vegetation; for example, the herbicide glyphosate is used to control a range of weeds in home gardens, bushland and agricultural situations.

**High volume spraying** - Method of applying a high volume of a liquid through the use of a motorised mechanical pump.

**Insecticides** - These destroy, suppress, stupefy, inhibit the feeding of, or prevent infestations or attacks by, an insect. Insecticides are used to control a wide variety of insect pests, including thrips, aphids, moths, fruit flies and locusts. In NSW, pesticides include products such as flea powders and liquids used externally on animals. Injections or other medicines administered internally to treat animals are veterinary medicines and are excluded.

**Low volume spraying** - Method of applying a low volume of a liquid using a hand pump applicator.

**Lures** - These are chemicals that attract a pest to a pesticide for the purpose of its destruction. Solely food-based lures, for example cheese in a mousetrap, are excluded and are not considered pesticides.

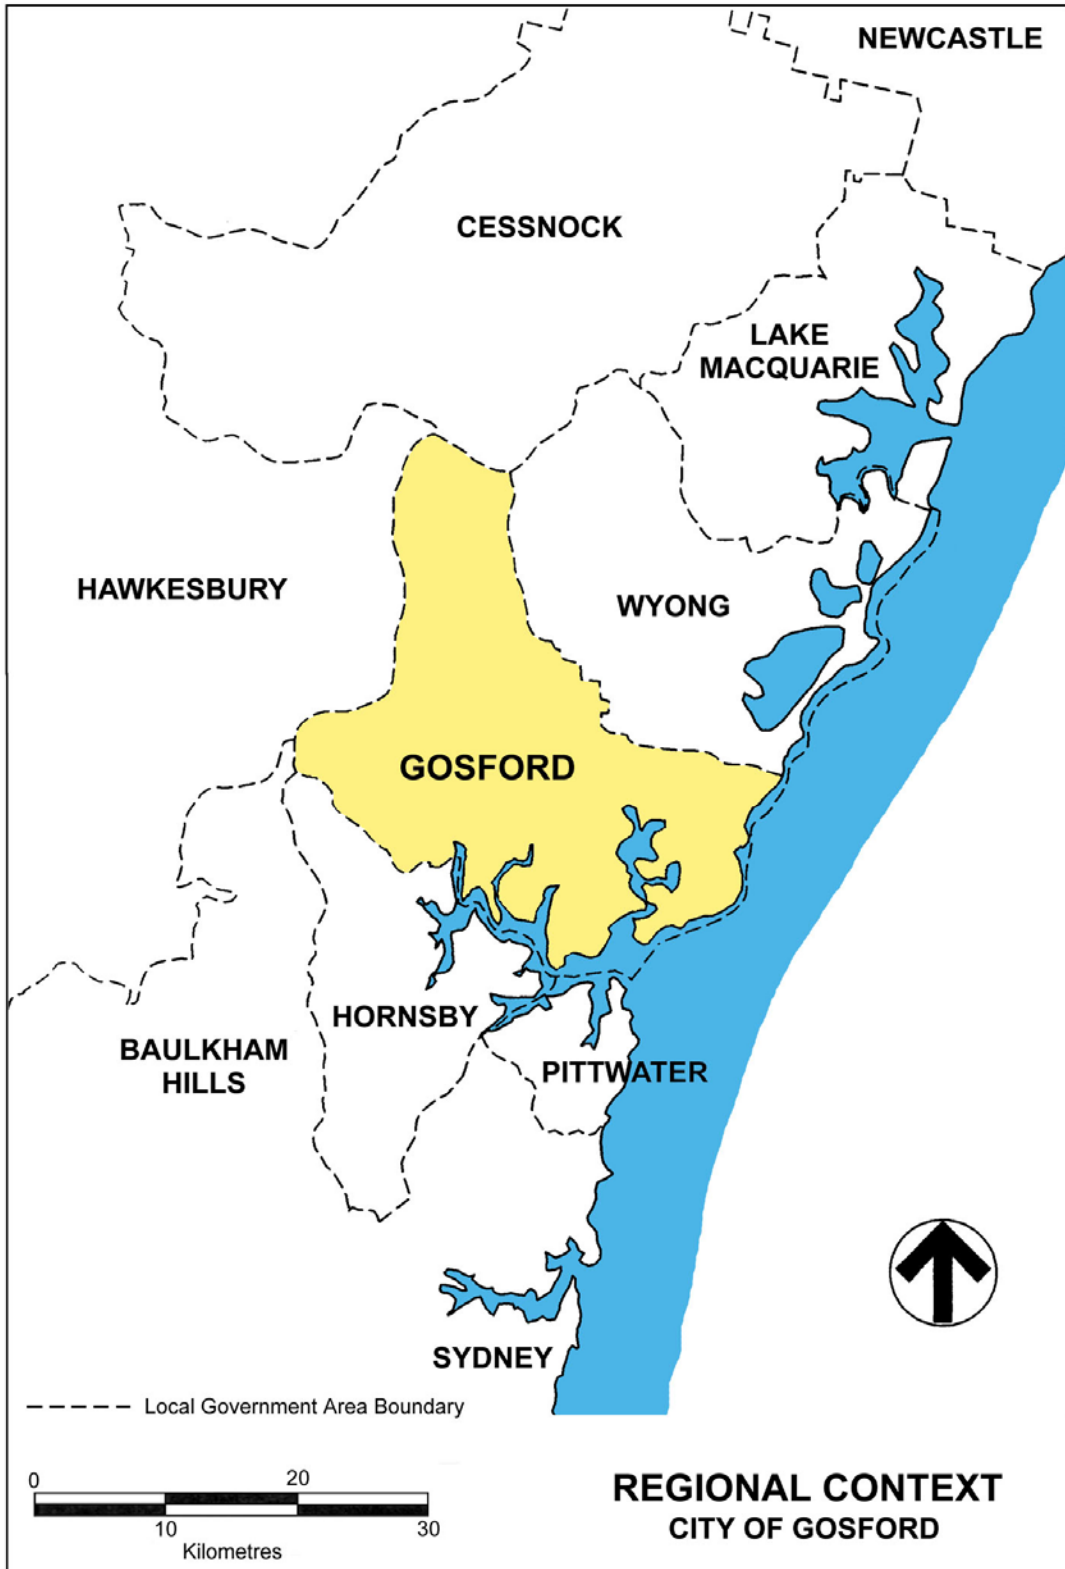

**Rodenticides** - These are pesticides used specifically for controlling rodents such as mice and rats.

**Repellents** - These repel rather than destroy a pest. Included in this category are personal insect repellents used to repel biting insects.

**Sensitive place** - School or pre-school, kindergarten, childcare centre, hospital, community health centre, nursing home, or any additional place declared to be a sensitive place by the Environment Protection Authority (now a part of the Department of Environment and Conservation), as declared under clause 11J(1) of the *Pesticides Regulation 1995* NSW.

**Termiticides** - These are pesticides used specifically for controlling termites, which may be applied as a spray or deployed as a bait.
